

CANTOR FITZGERALD INCOME TRUST, INC.

A PUBLICLY REGISTERED, NON-TRADED REAL ESTATE INVESTMENT TRUST¹

Securities distributed by Cantor Fitzgerald & Co. (Member FINRA / SIPC)

¹We elected to be taxed as a Real Estate Investment Trust ("REIT") beginning in the taxable year ending December 31, 2017. Our failure to qualify as a REIT would result in higher taxes, may adversely affect our operations, would reduce the amount of income available for distribution and would limit our ability to make distributions to our shareholders.

This is neither an offer to sell nor a solicitation of an offer to buy the securities described herein. An offering is made only by prospectus. This literature must be preceded or accompanied by a current prospectus. As such, a copy of the current prospectus must be made available to you in connection with this offering and should be read in order to understand fully all of the implications and risks of this offering. FOR USE IN NEW JERSEY AND OHIO

CANTOR FITZGERALD INCOME TRUST, INC.

Cantor Fitzgerald Income Trust, Inc. — (“CF Income Trust”) — is a publicly registered, non-traded, monthly-valued perpetual real estate investment trust (“REIT”) designed to potentially deliver tax-advantaged distributions² and structured for transparency and an alignment of interests with investors.³

Investment Strategy

Leveraging Cantor Fitzgerald’s (as defined below) fully-integrated real estate capabilities, CF Income Trust intends to expand its portfolio by focusing primarily on⁴:

Real Estate: Stabilized, income-producing commercial real estate (“CRE”) properties, primarily located in the U.S.

• Multifamily • Office • Industrial • Retail • Other

Real Estate Debt: Mortgage and mezzanine capital secured by stabilized, income-producing CRE properties which may provide additional sources of income and diversification.

• First Mortgage • Subordinated Mortgage • Mezzanine Capital

CF Income Trust may selectively acquire and hold real estate-related securities to support the overall investment objectives of the company.

² There is no guarantee of distributions. Distributions have and may continue to be paid from other sources other than cash flow from operations, including offering proceeds, which reduce investor's overall return.

³ All of our executive officers, some of our directors and other key real estate professionals are also officers, directors, managers and key professionals of our advisor, our dealer manager or other entities affiliated with Cantor and as a result face significant conflicts of interest.

⁴ We may change our investment objectives, policies and strategies at any time without stockholder consent. There is no assurance that we will be able to invest in our targeted investments. Diversification does not eliminate risk and does not assure better performance.

⁵ Institutional investors may invest in real estate on substantially different terms and conditions than retail investors.

Investment Objectives

The Potential Benefits of Investing In Real Estate

In an environment of low interest rates, increased life expectancies and lagging retirement savings, an appropriate investment allocation to commercial real estate may deliver a number of benefits to investors.

TAX-ADVANTAGED INCOME

Rental income may support monthly distributions with additional tax benefits from real estate depreciation.

COMPETITIVE TOTAL RETURN

Commercial real estate has historically generated an attractive total return comprised of current income and capital appreciation.

INFLATION PROTECTION

Historically, commercial real estate has provided a hedge against inflation.

PORTFOLIO DIVERSIFICATION

Adding real estate to an investment portfolio has historically reduced the overall risk of the portfolio while increasing total return.⁶

TAX EFFICIENCIES

The REIT structure maximizes cash flow available to investors while depreciation and the Qualified Business Income Deduction ("QBID") reduce the amount of taxes owed on distributions.

A Diversified Approach to Real Estate

CF Income Trust's diversified investment strategy enables the company to selectively pursue diverse investment opportunities across various commercial real estate property types and investment cycles.

⁶ Diversification does not eliminate risk and does not ensure better performance.

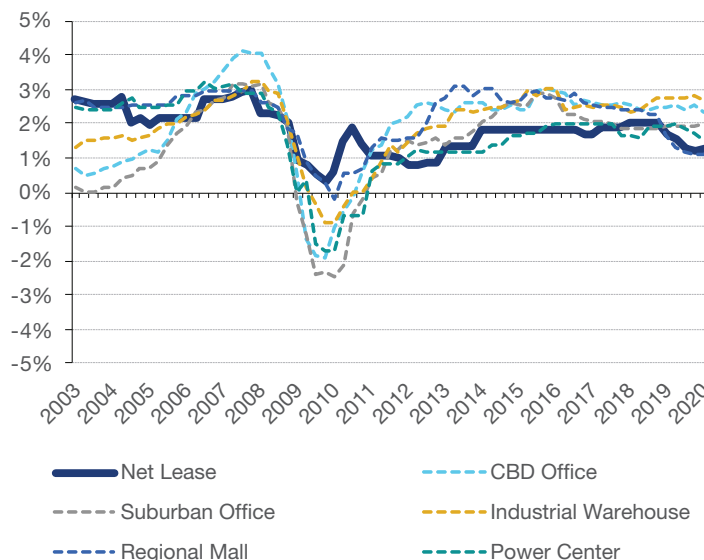

OUR INVESTMENT STRATEGY PROVIDES DIVERSIFICATION ACROSS PROPERTY TYPES⁷

Net Lease

Net Lease Investments May Offer Increasing Cash Flows Through Various Economic Environments

- Long term leases potentially mitigate volatility associated with market disruptions and economic cycles
- Net leases minimize ongoing capital requirements with most expenses borne by the tenant
- Escalating rents provide a potential inflation hedge and growth in rental income over time

Industrial

Logistics and E-Commerce Demand Creates Growth in Domestic Industrial Rents

Since 2016, e-commerce sales in the U.S. increased 50% to over \$600 billion and the percentage of overall sales represented by e-commerce continues to grow. The demand for industrial space is expected to outpace the delivery of new supply resulting in continued rent growth.

⁷ An investment in CF Income Trust is not a direct investment in real estate or CRE debt, and is subject to certain fees and expenses, as well as certain risks specifically applicable to an investment in non-traded REITs, which may adversely impact the value of the investment. For more information, please refer to the prospectus.

Multifamily

Housing Affordability Driving U.S. Homeownership Down and the Number of Renters Up

Multifamily offers attractive, risk-adjusted returns with low volatility compared to other real estate types as a result of healthy demand drivers, a diversified tenant base and access to attractive financing.

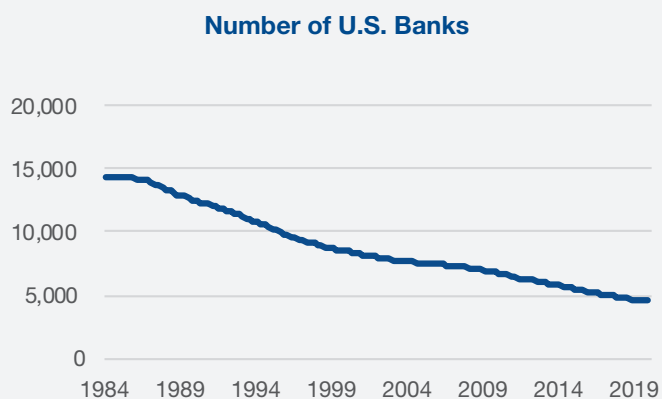

Commercial Real Estate Debt

Market Volatility has Created Attractive Investment Opportunities in CRE Debt

With the high demand for real estate financing, traditional lenders cannot meet the need alone. Since 1984, the number of commercial banks has decreased by approximately 69%. And, due to tighter regulations resulting from the financial crisis, banks are curtailed in their ability to provide the level of financing they once delivered.

Specialty lenders, less constrained by regulations, are stepping in to provide the types of capital solutions banks cannot.

We believe CF Income Trust is well positioned to take advantage of this supply and demand imbalance.

An investment in CF Income Trust is not a direct investment in commercial real estate. An investment in CF Income Trust is subject to fees and expenses that do not apply to such direct investments and is subject to various risks, including loss of principal and limited liquidity. There is no guarantee of distributions.

RISK FACTORS

1. We have a limited operating history and limited assets. This is a "blind pool" offering and we have not identified specific investments to acquire with the proceeds of this offering.
2. This is a "best efforts" offering and if we are unable to raise substantial funds, then we will be more limited in our investments.
3. The transaction price may not accurately represent the value of our assets at any given time and the actual value of your investment may be substantially less. The transaction price generally will be based on our most recently disclosed monthly NAV of each class of common stock (subject to material changes) and will not be based on any public trading market. In addition, the transaction price will not represent our enterprise value and may not accurately reflect the actual prices at which our assets could be liquidated on any given day, the value a third party would pay for all or substantially all of our shares, or the price at which our shares would trade on a national stock exchange. Further, our board of directors may amend our NAV procedures from time to time.
4. The amount and timing of distributions we may make is uncertain. Distributions have been and may continue to be paid from sources other than cash flow from operations, including, without limitation, from borrowings, the sale of assets, or offering proceeds. The use of these sources for distributions may decrease the amount of cash we have available for new investments, share repurchases and other corporate purposes, and could reduce your overall return.
5. There is no public trading market for our common stock and repurchase of shares by us will likely be the only way to dispose of your shares. We are not obligated to repurchase any shares under our share repurchase plan and may choose to repurchase only some, or even none, of the shares that have been requested to be repurchased.

In addition, repurchases will be subject to available liquidity and other significant restrictions. Further, our board of directors may modify, suspend or terminate our share repurchase plan. As a result, our shares should be considered as having only limited liquidity and at times may be illiquid.

6. All of our executive officers, some of our directors and other key real estate professionals are also officers, directors, managers and key professionals of our advisor, our dealer manager or other entities affiliated with Cantor, which we refer to as the Cantor Companies. As a result, they face conflicts of interest, including significant conflicts created by our advisor's compensation arrangements with us and other Cantor-advised programs and investors.
7. If we raise substantially less than the maximum offering, we may not be able to invest in a diverse portfolio of stabilized income-producing commercial real-estate, debt secured by commercial real estate and real estate-related assets.
8. We may change our investment policies without stockholder notice or consent, which could result in investments that are different from those described in this prospectus.
9. If we fail to qualify as a REIT, it would adversely affect our operations and our ability to make distributions to our stockholders.
10. The current outbreak of the novel coronavirus, or COVID-19, or the future outbreak of any other highly infectious or contagious diseases, could adversely impact or cause disruption to our financial condition and results of operations. Further, the spread of the COVID-19 outbreak could cause severe disruptions in the U.S. and global economy, may further disrupt financial markets and could potentially create widespread business continuity issues.
